CAF-O-LITE COMPANY

GENERAL OFFICES AND FACTORY, MUSKEGON, MICHIGAN

What is Cafolite

Cafolite is a material composed of specially treated and processed sheets, pressed together under heavy hydraulic pressure, which are then glued or cemented with a highly water resistant glue to all sides of a plywood core. Cafolite construction insures unusual resistance to warping and twisting due to the rigidity of construction, produces a top that will stay flat, does not need a heavy rail base, and can be attached to any type of base with wood screws.

Uses of Cafolite

In addition to Table Tops, Bar Tops and Counters, Cafolite is being successfully used for window capping in air-conditioned Railway Cars, Beauty Parlors and Barber Shop Equipment, Hotel Dressers and Desk Tops, Hospital Dressers and Night Stands, Working Surfaces of Kitchen Cabinets and Wall Paneling. Other uses will suggest themselves from the nature and special qualities of Cafolite material.

Cafolite Tops

are carried in a variety of stock sizes, ready for delivery. The wide range of colors is satisfying the requirements of leading decorators and architects. Cafolite Table Tops, Bar Tops, Counters and Counter Fronts installed in the newest establishments of the Country amply demonstrates the popularity, durability and practicability of Cafolite. This line represents the newest ideas in keeping with current trends of decoration.

Tops in Color

This array of attractive colors for tops as a note of accent throughout the room, or as a group of colors from which you may select a harmonizing shade to carry out your overall color scheme. Check your floor and wall colors, your points of accentuated interest, then select from these Cafolite colors those which will exactly meet your requirements. We manufacture all types of tops for Tables, Counters, Soda Fountains and Bar Tops in **Formica Realwoods** colors and black. We carry in stock all colors shown.

Formica Inlay, Pearlescent and other colors can be furnished on request.

When reviewing the superior qualities of Cafolite, versatility of design, material, finishing, processing, craftsmanship and availability, Cafolite will prove to deliver the excellent service you are expecting from quality merchandise.

Our Guarantee

Black Cafolite, Linen colors, and Realwood surfaces are guaranteed to withstand:

- 190 proof, alcohol.
- Lighted cigars and cigarettes.
- Fruit juices, acids, alkalies, solvents, dyes, inks, etc.
- Will not check or crack under the most extreme indoor usage.
- It is unusually resistant to mars, bumps and scratches.

veneer of actual wood is incorporated under the remarkably clear and ca sheet providing a plastic material all the durability and resistance to the appearance of a fine wood, and finish never before given to wood.

Caf-o-lite **EDGE BANDING**

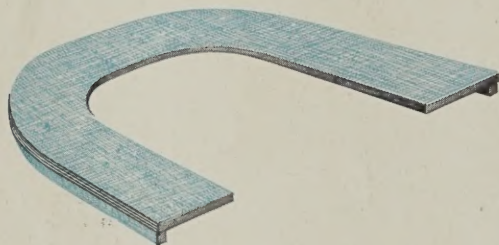

Visualizing attractive colored and black Cafolite tops with metal edge banding will provide many interesting contrasting or harmonizing combinations for decoration. In any busy establishment metal edges provide a positive guarantee against damage where chairs may strike the edge and corners of tables. We offer for your selection two of the best metal edges, the indentured aluminum alloy with a rich satin luster and a Stainless Steel banding. Colors may be striped in the indentures of the aluminum alloy molding.

For the institution requiring the attractiveness of a top self banded with the same material as the top surface, we recommend the illustrated Linen patterns and colors. Cafolite colored edges are quite as water proof and wear resistant as the top surface, and are applied under pressure and heat to form a water proof joint and seal. The self banded top has truly a **sealed six-sided construction**, insuring unusual resistance to twisting and warping.

Cafolite is one of the few materials that lends itself to the forming of raised edges, massive appearing drop rims and gutters.. The standard black gutter and black raised rim illustrated here can be fabricated into bar tops of any shape and color of material. There are actually miles of Cafolite bar top gutter in leading bars today.

The Cafolite Company has considerable floor space devoted to the manufacture of special shapes and sizes of Counters, Soda Fountain and Bar tops. Experienced craftsmen lay-out, cut, machine and assemble tops of many shapes in strict accordance with detailed drawings, insuring perfect joining to specified dimensions. The processing of Cafolite is accomplished with accurate controls under established conditions of heat and humidity to insure the fine quality of top material long maintained by Cafolite.

For quantities over 1000 lineal feet of one size basing, deduct 10%

For basing in 12' lengths, deduct 5%

STANDARD BASING has top exposed edge rounded to 1/8" radius and furnished in Satin finish.

ALL PRICES ARE LIST, F.O.B. MUSKEGON, MICHIGAN, SUBJECT TO CHANGE WITHOUT NOTICE

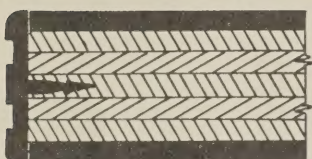

CAF-O-LITE TABLE AND COUNTER TOP SPECIFICATIONS

CAF-O-LITE tops are of six-sided construction, made by veneering a 1/16" - 1/8" thermosetting plastic-treated sheet to both sides of a plywood core under heavy hydraulic pressure with a highly water-resistant glue. This minimizes the possibility of warping or twisting. Five-ply core is used for 15/16" tops and seven-ply for 1-1/4". The surface lamination of the core is to be of a close grained wood to minimize irregularities and waviness in the top surface. All edges shall be bound with either 1/16"-1/8" thickness of plastic-treated sheet, "T" type extruded aluminum alloy, or stainless steel band of the indenture type with retaining tongue inserted and cemented into a groove in the edge of top.

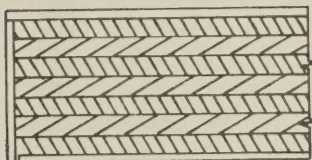

EDGE AND CORNER SPECIFICATIONS

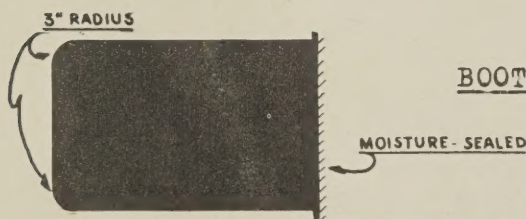

"R" EDGE is available only on black CAF-O-LITE tops. Standard corner radius is 1/8". For over 1/8" to 24" radius or any clipped corner - add \$1.20 per corner

METAL EDGE (either aluminum alloy or stainless steel) is available on either black or colored tops. 1" radius corners are standard. Over 3" to 24" or any clipped corner - add \$1.20 per corner

SELF-BANDED EDGE is available only on colored tops. Square corners are standard. For minimum of 3" radius corners - add \$2.20 per corner
Over 3" to 24" radius add \$3.30 per corner

BOOTH TOPS have two outside corners three inch radius and two square corners. They are banded on one short and two long edges, but the back edge (against the wall) is moisture sealed.

MAXIMUM SIZE FOR CAF-O-LITE COLOR OR REALWOOD TOPS WITHOUT JOINTS

#100 CHINESE RED, #620 PRIMA VERA or #700 TAN LINEN	-	36" x 84"

FIGURE LENGTHS of black CAF-O-LITE counter tops and metal edge in multiples of SIX INCHES.

QUANTITY ORDERS must be for five or more tops exactly alike to receive quantity prices shown above.

For **CURVED SECTIONS** of counter tops add 50% to the lineal foot prices of straight counter tops. Measure the longest edge of each curved section.

For **COMPLICATED LAYOUT**, write the factory for prices. Include sketch or drawing with all dimensions.

For **ALUMINUM or STAINLESS STEEL EDGE** on 15/16" or 1-1/4" counters add 20¢ per lineal foot of banding required.

For **ALUMINUM or STAINLESS STEEL EDGE** on drop rims add 65¢ per lineal foot of 15/16" or 1-1/4" banding required.

For **STRIPING INDENTURES** on aluminum banding add 10¢ per lineal foot of striping.

DOWEL JOINTS - No charge for dowel joints in straight counter tops of one width, when made in the least possible number of sections and in accordance with our standard manufacturing procedure.

For connecting right-angle returns, curved sections or straight counters of different widths:

Plain counters with or without raised rim	-	-	-	-	-	-	\$ 6.85

CAF-O-LITE BAR TOPS

Lineal foot price information

Prices below are for tops 1-1/4" thick by continuous 18" width and over 12' long with square corners.

Where drop rim is shown, the price includes 2" drop rim on the front edge and ends, in black on black CAF-O-LITE tops and in colors on colored tops.

Where raised rim is shown, the price includes black 1/4" x 1-3/8" raised rim on the front edge and ends, on both black and colored tops.

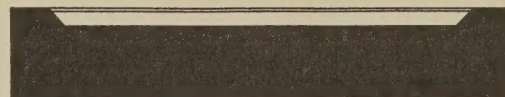

Where gutter is shown, the price includes standard 4" black gutter extending the full length of the top, on both black and colored tops.

Any deviation from the above specifications will require figures from prices shown on Pages 10 and 11.

LINEAL FOOT PRICES
